

RIMA pivot

Derived from the original, internationally prized desk luminaire RIMA, designer Matthias Pinkert thought up yet another variation, creating additional benefit: RIMA pivot!

RIMA pivot stands out as a peppy further development of the original luminaire. Instead of legs, it comes with a surprising mount for reception desks, bars, shelves or ornamental walls, persuading with a unique turning mechanism. The luminaire's sleek body may be swiveled back and forth by an angle of up to 45°, sending the light beam in different directions. Advantage: the user has even more freedom of choice in terms of defining lightning conditions.

Easily and nearly invisibly, RIMA pivot may be attached to various boards (reception desks, presentation shelves etc.) using a clamping device or screws. Anyone looking for an elegant alternative to perturbing pendant luminaires or space-consuming desk lamps will be thrilled by the sophisticated finish of this fascinating design luminaire.

The possible fields of use are seemingly endless: libraries, wall shelves, art work or decorative items – virtually all areas or objects can be illuminated and thematically staged using RIMA pivot.

Result: Light and space, wherever you need it!

Technical Details RIMA pivot

Power Consumption	nur 13 Watt
Power Current	230 Volt
Illuminants	56 LEDs
Light color	warmweiß
Lit areas	1-2
Rotation angle	45°
Material aluminum	weiß/schwarz
Size (length, width, height)	784x 46 x 79mm
Weight	1200 Gramm
Color temperature	2900K
Protection Category	2
Certificates	CE, IP 20
